## Summary of Other Products and Services

\* Your approved credit is not a commitment to loan funds. It is based on the value of your investment account which could change daily. The amount you may be eligible to borrow may differ from your approved credit. Borrowing against securities has its risks and is not appropriate for everyone. If the value of your collateral declines, you may be required to deposit cash or additional securities, or the securities in your account may be sold to meet the margin call. A minimum account value is required if you have loan features on your account. Your interest will begin to accrue from the date of the loan and be charged to the account. Your interest rate will vary depending on the assets under care of your Edward Jones Pricing Group. For more information on how your interest rate is calculated, contact your financial advisor or please visit: [www.edwardjones.com/disclosures/marginloans](http://www.edwardjones.com/disclosures/marginloans)

## Select Account Client Profile

This Client Profile reflects your current financial information, investment time horizon and risk tolerance. This information helps Edward Jones recommend an appropriate Portfolio Objective for your account. The Client Profile also provides you with important disclosure information regarding your Select Account.

No action is required at this time. However, after reviewing the information below, you may want to consider discussing it with your financial advisor. The information below is effective as of June 19, 2020.

**Net Worth: This information is on file for your account. Contact your financial advisor for details.**

Assets minus liabilities but excluding the value of your primary residence.

### Accumulation Years: 3-5 years

The time frame until you expect to need the funds (e.g., years until your retirement begins). Depending on your account type, certain limitations to this time frame may apply.

### Distribution Years: 0-2 years

The time frame over which you expect to distribute the funds (e.g., years in retirement). Depending on your account type, certain limitations to this time frame may apply.

### Your Risk Tolerance: Low

Risk tolerance describes your comfort level with investment risk and the potential for declines in portfolio value in exchange for higher potential returns. For example, if your risk tolerance is high, you may be more comfortable with the potential for significant declines in value to potentially achieve higher investment returns. For joint accounts, contact your financial advisor for information regarding the applicable risk tolerances for each owner.

### Understanding Your Portfolio Objective

When investing for your long-term financial goals in the Select Account, the combination of your risk tolerance, accumulation years and distribution years results in a recommended Portfolio Objective for your account. Based on your individual circumstances, there may be situations when alternative Portfolio Objectives are available to you, in addition to the specific Portfolio Objective recommended by Edward Jones.

### Account Portfolio Objective: Preservation Of Principal

Your Portfolio Objective gives you and your financial advisor overall guidance on how to invest your assets to achieve your goal. If your account is assigned to a goal with Edward Jones, your Portfolio Objective for this account may differ from the goal Portfolio Objective based on other accounts and assets you have designated for that goal.

### Important Information About Your Account

You have selected an alternative account Portfolio Objective that is more conservative than the recommended Portfolio Objective. The recommended Portfolio Objective was based upon your risk tolerance and investment time horizon. This alternative Portfolio Objective has a higher allocation to fixed-income securities than the recommended Portfolio Objective. While the alternative Portfolio Objective is likely to experience less volatility and less potential for losses than the recommended Portfolio Objective, the alternative Portfolio Objective is also likely to generate less potential return over time. It is important to understand that Edward Jones' investment recommendations will be made based on your selected Portfolio Objective for this account, not our recommended Portfolio Objective.
